

MONTHLY RETURN  
OF THE  
BIRTHS, DEATHS, AND MARRIAGES  
REGISTERED  
IN EIGHT OF THE PRINCIPAL TOWNS OF  
SCOTLAND;  
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

JANUARY 1894.

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

## REPORT.

DURING the month of January 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4040 children, of whom 2044 were males, and 1996 females. Of these, 3703 were legitimate, and 337 illegitimate, being in the proportion of one illegitimate in every 12·0 Births, or the illegitimate Births constituted 8·3 per cent. of the whole. In Paisley, 4·5 per cent. of the Births were illegitimate; in Leith, 5·8; in Greenock, 6·9; in Glasgow, 7·5; in Perth, 8·8; in Edinburgh, 9·5; in Aberdeen, 10·7; and in Dundee, 12·0 per cent.

1578 Marriages were registered in these Towns during the month, being 17 above the January average of the last ten years, allowing for increase of the population.

The Deaths of 2846 persons were registered in these Towns during January, of whom 1398 were males, and 1448 females. Increase of the population being allowed for, this is 164 below the average number for the month during the last ten years.

A comparison of the Deaths registered shows that during January, the mortality was at the annual rate of 17·4 deaths per thousand persons in Greenock, 20·2 in Edinburgh, 20·4 Leith, 21·1 in Aberdeen, 23·4 in Glasgow, 24·6 in Dundee, 26·3 in Paisley, and 27·9 in Perth.

Of the 1367 Deaths registered in Glasgow, 334 were of children under one year

of age, and 242 of persons over 60 years; of the 465 in Edinburgh, 79 were aged under one year, and 139 over 60; of the 332 in Dundee, 85 were under one, and 84 over 60; of the 236 in Aberdeen, 65 were under one, and 75 over 60; of the 125 in Leith, 25 were under one, and 27 over 60; of the 157 in Paisley, 29 were under one, and 43 over 60; of the 92 in Greenock, 20 were under one, and 18 over 60; and of the 72 in Perth, 16 were under one, and 22 over 60 years.

Of the whole 2846 Deaths registered, 1064 or 37·4 per cent., were of children under five years of age. In Edinburgh, 29·0 per cent. of the persons who died were under five years of age; in Paisley, 35·0; in Leith, 36·8; in Dundee, and in Greenock, 37·0; in Perth, 37·5; in Aberdeen 39·8; and in Glasgow, 40·2 per cent.

Miasmatic Diseases caused 333 Deaths, or 11·7 per cent. of the whole mortality. This rate was exceeded in Leith from the prevalence of Small-pox and Hooping-Cough, and in Perth from Hooping-Cough alone.

Hooping-Cough was the most fatal of the epidemics, having caused 182 deaths, or 6·4 per cent. of the whole mortality. In Edinburgh, 5·4 per cent. of the deaths there were from Hooping-Cough; in Glasgow, 6·6; in Dundee, 8·1; in Leith, 8·8; and in Perth, 16·7 per cent.

Small-pox caused 10 deaths, of which 9 occurred in Leith, and one in Edinburgh. Of the 9 cases in Leith, 3 were vaccinated, 3 unvaccinated, and of one there was no statement, while in one case vaccination was concurrent with Small-pox, and one had no marks, but was stated to have been vaccinated. The individual who died in Edinburgh, had been once vaccinated.

Diarrhœa and Dysentry caused 50 deaths; Diphtheria, 44; Scarlatina, 29; Puerperal Fever, 11; and Measles, 9.

Enteric Fever was stated to have caused 14 deaths.

Intemperance caused 12 deaths, of which 10 were from Chronic Alcoholism, and 2 from Delirium Tremens.

Apoplexy caused 100 deaths; Paralysis, 52; Heart Diseases, 252; and Premature Birth Debility, 67.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 641, or 22·5 per cent. of the total mortality. Those from Consumption numbered 282, or 9·9 per cent. Croup caused 18 deaths.

111 deaths resulted from Violent Causes, 5 of which were suicidal (2 by Hanging, 2 by Drowning, and 1 by Carbolic Acid poisoning).

10 females were aged 90 years and upwards, the eldest of whom were three widows, aged respectively 94 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of JANUARY 1894.

Mean barometric pressure, 29.636 inches; less than the average for the same month of 1856-93 by 0.172 inch.

Barometric monthly range, 1.810 inch; greater by 0.161 inch.

Mean temperature,  $37^{\circ}6$ ; less by  $0^{\circ}2$ .

Mean daily range of temperature,  $9^{\circ}9$ ; greater by  $0^{\circ}9$ .

Mean humidity, 85; less by 2.

Rain, number of days, 23; greater by 6.

Rain, depth in inches, 4.51; greater by 0.77 inch.

Wind, pressure on square foot, 2.91 lbs.; greater by 0.91 lb.

Wind, direction of, E. to W. as 6 to 13, and N. to S. as 3 to 9; the average being E. to W. as 5 to 12, and N. to S. as 4 to 8.

Thus the January of 1894 has been characterised by a low pressure, with a large range, a mean temperature slightly under the average, with a mean daily range about a degree above it, and wind, as regards direction, nearly the average, but of a force much above it.

The barometric fluctuations of the 28th and 29th were unusually large, pressure rising about an inch, and falling nearly as much during the time. Of the five cyclones which passed over North-Western Europe during the month, gradients were frequently formed for very strong winds, and these storms overspread regions exceptionally extensive.

Temperature was very low on the 6th, 7th, and 8th, falling on the 7th at Perth to  $-4^{\circ}0$ , or  $4^{\circ}$  below zero, and at Dundee to  $6^{\circ}4$ . This low reading at Perth is confirmed by the observations made at other inland stations, at several of which even lower temperatures were recorded. On the morning of the 6th, temperature fell to zero on the top of Ben Nevis, being the lowest observed there since the Observatory was opened in 1883. At Edinburgh on the same day the maximum temperature was only  $17^{\circ}8$  from 9 A.M. to 9 P.M. The absolute maximum temperature was  $53^{\circ}0$  at Perth on the 12th, and at Leith on the 11th. The absolute range of temperature and the mean daily range were both large.

The rainfall at Greenock was 39 per cent. above the average of January, whilst at Leith it was 11 per cent. below it. All the rather large daily falls that occurred were at the stations in the west. The following are reported from Greenock, 0.83 inch on the 15th, 0.92 inch on the 19th, 0.70 inch on the 23rd, and again on the 24th, 0.84 inch on the 26th, and 0.92 inch on the 29th; from Glasgow, 0.86 inch on the 26th; and from Paisley, 0.71 inch on the 15th, and 0.81 inch on the 19th.

Thunder and lightning, with heavy snow, occurred in Edinburgh on the 30th at 11.15 P.M., and at Leith at nearly the same time.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JANUARY 1894.

**REPORT.**

DURING the month of February 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3401 children, of whom 1772 were males, and 1629 females. Of these, 3152 were legitimate, and 249 illegitimate, being in the proportion of one illegitimate in every 13·7 Births, or the illegitimate Births constituted 7·3 per cent. of the whole. In Perth, 2·1 per cent. of the Births were illegitimate; in Paisley, 5·7; in Leith, 6·5; in Glasgow, 7·0; in Dundee, 7·3; in Edinburgh, 7·9; in Aberdeen, 8·8; and in Greenock, 10·6 per cent.

The number of Marriages in February was 632. Allowing for increase of the population this is 12 below the average for the Towns during the month of February of the last ten years.

The Deaths of 2310 persons recorded in these Towns during the month, of whom 1144 were males, and 1166 females. Increase of the population being allowed for, this is 244 below the average number for February, during the last ten years.

A comparison of the Deaths registered shows that during February, the mortality was at the annual rate of 13·3 deaths per thousand persons in Paisley, 17·9 in Edinburgh, 20·1 in Greenock, 20·7 in Glasgow, 21·1 in Dundee, 21·2 in Aberdeen, 25·3 in Leith, and 28·3 in Perth.

Of the 1093 Deaths registered in Glasgow, 236 were of children under one year

of age, and 225 over 60 years; of the 372 in Edinburgh, 75 were under one, and 86 over 60 years; of the 257 in Dundee, 59 were under one, and 63 over 60; of the 214 in Aberdeen, 66 were under one, and 59 over 60; of the 140 in Leith, 28 were under one, and 35 over 60; of the 72 in Paisley, 20 were under one, and 17 over 60; of the 96 in Greenock, 24 were under one, and 23 over 60; and of the 66 in Perth, 15 were under one, and 20 over 60 years.

Of the whole 2310 Deaths registered, 867 or 37·5 per cent., were of children under five years of age. In Edinburgh, 33·9 per cent. of the persons who died were under five years of age; in Perth, 34·8; in Leith, 35·0; in Dundee, 36·2; in Glasgow, 38·1; in Aberdeen, 39·3; in Greenock, 42·7; and in Paisley, 48·6; per cent.

Miasmatic Diseases caused 286 Deaths, or 12·4 per cent. of the whole mortality. This rate was exceeded in Leith in consequence of the prevalence there of Small-pox and Hooping-Cough, and in Perth from Hooping-Cough.

Hooping-Cough was the most fatal epidemic, having caused 152 deaths, or 6·6 per cent. of the whole mortality. In Edinburgh, 5·4 per cent. of the deaths were from Hooping-Cough; in Dundee, 5·8; in Glasgow, 6·6; in Paisley, 6·9; in Aberdeen, 7·9; in Leith, 9·3; and in Perth, 13·6 per cent.; while in Greenock only one death resulted from this cause.

Small-pox caused 8 deaths, of which 7 occurred in Leith, and one in Edinburgh.

Diphtheria caused 49 deaths; Scarlatina, 32; Diarrhoea and Dysentery, 29; Puerperal Fever, 7; and Measles, 3.

Fevers caused 24 deaths, of which 3 were attributed to Typhus (2 in Glasgow and one in Dundee) and 21 to Enteric Fever.

Intemperance caused 3 deaths, all being ascribed to Chronic Alcoholism.

Apoplexy caused 82 deaths; Paralysis, 39; Heart Diseases, 190; and Premature Birth Debility, 64.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 494, or 21·4 per cent. of the total mortality. Those from Consumption alone numbered 221, or 9·6 per cent. 18 deaths were attributed to Croup.

65 deaths resulted from Violent Causes, 3 of which were suicidal (1 by Hanging, 1 by Cut Throat, and 1 Not Stated).

3 males, and 6 females were aged 90 years and upwards, the eldest of whom was a Tailor aged 94 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

### For the month of FEBRUARY 1894.

Mean barometric pressure, 29·735 inches; less than the average for the same month of 1856–93 by 0·139 inch.

Barometric monthly range, 1·968 inch; greater by 0·511 inch.

Mean temperature,  $39^{\circ}8$ ; greater by  $0^{\circ}6$ .

Mean daily range of temperature,  $10^{\circ}2$ ; greater by  $0^{\circ}7$ .

Mean humidity, 86; being the average.

Rain, number of days, 22; greater by 7.

Rain, depth in inches, 7·68; greater by 4·78 inches.

Wind, pressure on square foot, 2·19 lbs.; greater by 0·19 lb.

Wind, direction of, E. to W. as 4 to 15, and N. to S. as 2 to 7; the average being E. to W. as 6 to 11, and N. to S. as 4 to 6.

Hence the February of 1894 has been characterised by a rainfall, heavy beyond precedent, being 165 per cent. above the average of the month; by rapid and large fluctuations of the barometer; by a barometric monthly range unusually large, being only exceeded by the Februarys of 1860 and 1867; and by a succession of wide-spread storms of wind, frequently very violent.

Rapid rises and falls of the barometer occurred on the 3rd, 6th, 8th, 9th, 11th–12th, 22nd–23rd, and 24th–25th. Of these the most noteworthy was the fluctuation of the 12th, on which day in the hour from 4 to 5 A.M. the barometer rose 0·307 inch, which is undoubtedly one of the largest, if not the largest, that has ever been observed in the British Islands.

The mean temperature was about half a degree above the average, being the mean at Aberdeen, but  $1^{\circ}2$  above it at Perth, Leith, Glasgow, and Paisley. The absolute highest temperature was  $55^{\circ}0$  at Leith on the 6th, and the lowest  $20^{\circ}4$  on the 14th at Aberdeen. Frost occurred seldom, temperature falling below freezing at Edinburgh only on 7 nights, and the minimum there being only  $26^{\circ}1$ . The comparative absence of 'hard' weather was due to the almost unbroken succession of large cyclones which swept over north-western Europe on paths to the northward of Scotland, and accompanied on their south sides by heavy long continued south-westerly winds, and heavy rains.

The 22 days of rain is the largest hitherto recorded by the Society's observers in February, and the amount of the rainfall at these large towns, 7·68 inches, is phenomenally large, the next largest during the last 39 years being 5·08 inches in February 1866. The percentages of excess above the normals are 20 at Aberdeen; 107 at Dundee; 151 at Perth; 234 at Leith; 247 at Edinburgh; 224 at Glasgow; 208 at Paisley; and 120 at Greenock. The rain fell chiefly at these four periods, viz., 1st–2nd, 5th–11th, 15th–17th, and 23rd–28th, the wettest being from the 5th to the 11th. On these seven days 6·09 inches fell at Greenock, whereas at Aberdeen only 0·55 inch fell; and as regards particular days 2·51 inches fell at Greenock on the 6th, while at Aberdeen only 0·01 inch is recorded on the same day.

Thunder and lightning occurred on the 24th at Leith and Edinburgh, on the 25th at Edinburgh, and on the 27th at Dundee. Auroras are reported on the 23rd and 28th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS  
Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

# MONTHLY RETURN

OF THE

## BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

**MARCH 1894.**

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

### REPORT.

DURING the month of March 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3934 children, of whom 1995 were males, and 1939 females. Of these, 3632 were legitimate, and 302 illegitimate, being in the proportion of one illegitimate in every 13·0 Births, or the illegitimate Births constituted 7·7 per cent. of the whole. In Perth, 2·9 per cent. of the Births were illegitimate; in Greenock, 6·4; in Paisley, 6·9; in Glasgow, and in Edinburgh, 7·4; in Leith, 8·3; in Dundee, 8·7; and in Aberdeen, 10·3 per cent.

698 Marriages were registered in these Towns during March. Allowing for increase of the population, this number is 22 below the average for the month during the last ten years.

The Deaths of 2524 persons were recorded in these Towns during the month, of whom 1305 were males, and 1219 females. The natural increase of the population being allowed for, this is 365 below the March average of the last ten years.

A comparison of the Deaths registered shows that during March, the mortality was at the annual rate of 17·0 deaths per thousand persons in Leith, 17·1 in Paisley, 17·8 in Edinburgh, 19·3 in Aberdeen, 20·2 in Greenock, 20·8 in Dundee, 21·4 in Glasgow, and 22·8 in Perth.

Of the 1246 Deaths registered in Glasgow, 248 were of children under one year of age, and 195 over 60 years; of the 410 in Edinburgh, 74 were aged under one

year, and 108 over 60 years; of the 280 in Dundee, 70 were under one, and 66 over 60 years; of the 216 in Aberdeen, 56 were under one, and 57 over 60; of the 104 in Leith, 23 were under one, and 27 over 60; of the 102 in Paisley, 21 were under one, and 25 over 60; of the 107 in Greenock, 18 were under one, and 24 over 60; and of the 59 in Perth, 12 were under one, and 17 over 60 years.

Of the whole 2524 Deaths registered, 897 or 35·5 per cent., were of children under five years of age. In Perth, 30·5 per cent. of the persons who died were under five years of age; in Edinburgh, 31·2; in Paisley, 31·4; in Leith, 33·7; in Glasgow, 36·0; in Greenock, 37·4; in Dundee, 38·9; and in Aberdeen, 39·8 per cent.

Miasmatic Diseases caused 285 Deaths, or 11·3 per cent. of the whole mortality. These diseases were present in all the Towns, and with the exception of Greenock, where the rate was 5·6 per cent., in nearly the same extent in each.

Hooping-Cough continued to be the most fatal epidemic, having caused 155 deaths, or 6·1 per cent. of the whole mortality. In Glasgow 6·1 per cent. of the deaths were from that cause in Leith, 6·7; in Dundee, 7·5; in Paisley, 7·8; and in Aberdeen, 7·9 per cent.

Small-pox caused 4 deaths—2 in Edinburgh, and one each in Glasgow, and Leith, the two latter were both vaccinated, but regarding the 2 in Edinburgh no statement was made.

Scarlatina caused 37 deaths; Diarrhœa and Dysentery, 36; Diphtheria 33; Measles, 15; and Puerperal Fever, 13.

Fevers caused 26 deaths, of which one (in Glasgow), was attributed to Typhus, and 25 to Enteric Fever (of which 22 occurred in Glasgow).

Intemperance caused 8 deaths, of which 7 were attributed to Chronic Alcoholism and one to Delirium Tremens.

Apoplexy caused 82 deaths; Paralysis, 48; Heart Diseases, 235; and Premature Birth Debility, 57.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 493, or 19·5 per cent. of the total mortality. Those from Consumption alone numbered 290, or 11·5 per cent. 12 deaths were attributed to Croup.

101 deaths resulted from Violent Causes, of which 7 were suicides (3 by Cut Throat, 2 by Drowning, 1 by Poisoning, and 1 by jumping over a window).

One male, and 8 females were aged 90 years and upwards, the eldest of whom were two widows, both aged 93 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

### For the month of MARCH 1894.

Mean barometric pressure, 29·800 inches; less than the average for the same month of 1856–93 by 0·052 inch.

Barometric monthly range, 1·637 inch; greater by 0·205 inch.

Mean temperature,  $43^{\circ}3$ ; greater by  $3^{\circ}1$ .

Mean daily range of temperature,  $15^{\circ}2$ ; greater by  $3^{\circ}7$ .

Mean humidity, 82; less by 2.

Rain, number of days, 13; less by 2.

Rain, depth in inches, 2·55; less by 0·05 inch.

Wind, pressure on square foot, 1·30 lb.; less by 0·67 lb.

Wind, direction of, E. to W. as 4 to 14, and N. to S. as 3 to 8; the average being E. to W. as 7 to 12, and N. to S. as 5 to 6.

Hence the month of March 1894 was characterised by a mean temperature and daily range both greatly above the average, a marked predominance of W., S.W., S. and S.E., winds, and a deficiency of E., N.E., N., and N.W., winds; and an excess of rainfall in the west, and a deficiency in the east of the country.

The barometric fluctuations were unusually large and frequent during the first eleven days of the month, and it was during this period that nearly the whole of the rain fell. At Greenock 1·88 inch fell on the 5th, and for the eight days ending the 11th there fell 5·68 inches, the amount for the whole month being 6·54 inches; and at Paisley 1·06 inch on the 5th. At Greenock in the south-west it was 48 per cent. above the average of March, whereas at Aberdeen in the north-east, the amount was only 0·71 inch, or 70 per cent. below the average.

The high temperature characterising the month was about equally distributed over the eight towns, and was almost altogether occasioned by the warm weather which generally ruled, during the last eleven days of the month. The mean temperature of these days at Glasgow was  $48^{\circ}3$ , accompanied with the very high mean range of  $26^{\circ}6$ . The absolute maximum temperature of  $65^{\circ}0$  was recorded at Glasgow, and Leith on the 30th; and the absolute minimum  $26^{\circ}5$  at Perth on the 17th.

The average estimated wind force was considerably under the average, even though for the first eleven days, strong winds were of frequent occurrence.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS  
Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,  
During the Month of MARCH 1894.

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

REPORT.

DURING the month of April 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3974 children, of whom 1993 were males, and 1981 females. Of these, 3712 were legitimate, and 262 illegitimate, being in the proportion of one illegitimate in every 15·2 Births, or the illegitimate Births constituted 6·6 per cent. of the whole. In Leith, 3·9 per cent. of the Births were illegitimate; in Greenock, 5·1; in Perth, 5·6; in Paisley, 5·9; in Glasgow, 6·0; in Edinburgh, 7·2; in Aberdeen, 8·8; and in Dundee, 9·3 per cent.

981 Marriages were registered in these Towns during April. This is 65 above the average for the month during the last ten years, increase of the population being allowed for.

The Deaths of 2405 persons were registered in these Towns during the month, of whom 1186 were males, and 1219 females. Allowing for increase of the population, this number is 269 below the average for April during the last ten years.

A comparison of the Deaths registered shows that during April the mortality was at the annual rate of 16·9 deaths per thousand persons in Perth, 17·7 in Edinburgh and in Greenock, 18·8 in Dundee and in Aberdeen, 19·0 in Paisley, 20·8 in Leith, and 21·2 in Glasgow.

Of the 1197 Deaths registered in Glasgow, 220 were of children under one year of age, and 215 over 60 years; of the 394 in Edinburgh, 69 were aged under one

year, and 88 over 60; of the 245 in Dundee, 63 were under one, and 58 over 60; of the 203 in Aberdeen, 40 were under one, and 57 over 60; of the 123 in Leith, 29 were under one, and 25 over 60; of the 110 in Paisley, 24 were under one, and 30 over 60; of the 91 in Greenock, 21 were under one, and 19 over 60; and of the 42 in Perth, 8 were under one, and 11 over 60 years.

Of the whole 2405 Deaths registered, 857, or 35·6 per cent., were of children under five years of age. In Perth, 26·2 per cent. of the persons who died were under five years of age; in Edinburgh, 31·5; in Aberdeen, 34·0; in Leith, 35·0; in Paisley, 35·5; in Greenock, 36·3; in Glasgow, 36·4; and in Dundee, 41·6 per cent.

Miasmatic Diseases caused 256 Deaths, or 10·6 per cent. of the whole mortality. This rate was exceeded in Aberdeen and Leith, chiefly in consequence of the presence in each of these towns of Hooping-Cough.

Small-pox caused 9 deaths, of which 4 occurred in Glasgow, 2 in Edinburgh, and 3 in Leith. Of those in Glasgow, 2 were stated to have been vaccinated, and 2 unvaccinated; regarding the 2 in Edinburgh no statement was made; and of those in Leith, 2 were vaccinated, and the other not stated.

Hooping-Cough was again the most fatal epidemic, having caused 131 deaths, or 5·4 per cent. of the whole mortality. In Glasgow 5·7 per cent. of the deaths were from Hooping-Cough; in Paisley, 7·3; in Leith, 8·1; and in Aberdeen, 8·9 per cent.

Diphtheria caused 37 deaths; Diarrhoea and Dysentery, 23; Scarlatina, 19; Measles, 15; and Puerperal Fever, 8.

Fevers caused 29 deaths, of which one (in Dundee), was attributed to Typhus, and 28 to Enteric Fever (of which 23 occurred in Glasgow).

Intemperance caused 5 deaths, all being ascribed to Chronic Alcoholism.

Apoplexy caused 90 deaths; Paralysis, 51; Heart Diseases, 235; and Premature Birth Debility, 72.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 462, or 19·2 per cent. Those from Consumption alone numbered 279, or 11·6 per cent. 12 deaths were attributed to Croup.

77 deaths resulted from Violent Causes, of which 4 were suicides (2 by Hanging, 1 by Cut Throat, and 1 by Shooting).

One male, and 5 females were aged 90 years and upwards, the eldest, aged 99 years, being the widow of a Blacksmith.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of APRIL 1894.

Mean barometric pressure, 29·877 inches; less than the average for the same month of 1856–93 by 0·028 inch.

Barometric monthly range, 1·014 inch; less by 0·212 inch.

Mean temperature,  $47^{\circ}4$ ; greater by  $2^{\circ}6$ .

Mean daily range of temperature,  $13^{\circ}5$ ; less by  $0^{\circ}4$ .

Mean humidity, 82; greater by 2.

Rain, number of days, 15; greater by 2.

Rain, depth in inches, 1·62; less by 0·52 inch.

Wind, pressure on square foot, 1·05 lb.; less by 0·65 lb.

Wind, direction of, E. to W. as 14 to 4, and N. to S. as 3 to 7; the average being E. to W. as 9 to 9, and N. to S. as 5 to 6.

The month of April has therefore been unusually warm, with a diurnal range nearly the average, with a mean barometric pressure slightly under and a monthly range considerably under the mean with an unusual prevalence of E. and S.E. winds.

Barometric pressure was very much higher in the east than in the west of the country, forming gradients for the south-easterly winds which were so prevalent, but as the gradients were small, the wind was light.

The temperature was  $2^{\circ}6$  above the average, being only  $0^{\circ}4$  lower than April last year, both of which were higher than the April of any year since 1870. The towns differed greatly in respect of temperature. Thus, the mean for Aberdeen was  $46^{\circ}1$ , and for Glasgow  $49^{\circ}0$ , Glasgow being therefore nearly  $3^{\circ}0$  higher. At Aberdeen the S.E. winds blew directly from the sea, which in this season, is much colder than the land, whereas the same winds reached Glasgow after traversing a long stretch of comparatively heated land; and in the same connection it will be noted that while at Glasgow the mean daily range of temperature was  $16^{\circ}2$ , at Aberdeen it was only  $10^{\circ}6$ . Another marked feature of the temperature was the almost complete absence of frost, the absolutely lowest for the month was  $32^{\circ}0$  at Perth on the 1st; the absolutely highest,  $66^{\circ}4$ , at Glasgow on the 11th.

The mean rainfall was 25 per cent. under the average, the amounts differed greatly among the towns, the greatest amount being 2·28 inches at Greenock, and the least 1·04 inch at Aberdeen. At Aberdeen the fall was 51 per cent. under the average, whereas at Glasgow it was 2 per cent. above it. A peculiar feature of the rainfall is that it was well distributed over the month, but generally in very small quantities. Indeed only on two days did no rain fall at any of the towns. About half of the monthly fall occurred from the 14th to the 18th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of APRIL 1894.

# MONTHLY RETURN

OF THE

## BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

MAY 1894.

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

### REPORT.

DURING the month of May 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4026 children, of whom 2055 were males, and 1971 females. Of these, 3726 were legitimate, and 300 illegitimate, being in the proportion of one illegitimate in every 13·4 Births, or the illegitimate Births constituted 7·5 per cent. of the whole. In Leith, 4·0 per cent. of the Births were illegitimate; in Paisley, 5·1; in Greenock, 7·2; in Glasgow, 7·3; in Dundee, 7·8; in Edinburgh, 8·1; in Aberdeen, 9·2; and in Perth, 10·9 per cent.

498 Marriages were registered in these Towns during May. If increase of the population be allowed for, this number is 27 below the May average of the last ten years.

The Deaths of 2409 persons were registered in these Towns during the month, of whom 1235 were males, and 1174 females. Increase of the population being allowed for this number is 232 below the average for May during the last ten years.

A comparison of the Deaths registered shows that during May the mortality was at the annual rate of 17·1 deaths per thousand persons in Paisley, 17·5 in Edinburgh, 17·8 in Leith, 18·1 in Aberdeen, 19·1 in Greenock, 19·9 in Dundee and in Perth, and 20·1 in Glasgow.

Of the 1174 Deaths registered in Glasgow, 220 were of children under one year of age, and 212 of persons over 60 years; of the 402 registered in Edinburgh, 62

were aged under one year, and 96 over 60 years; of the 268 in Dundee, 64 were under one year, and 53 were over 60; of the 202 in Aberdeen, 40 were under one, and 55 over 60; of the 109 in Leith, 20 were under one, and 22 over 60; of the 102 in Paisley, 20 were under one, and 25 over 60; of the 101 in Greenock, 19 were under one, and 22 over 60; and of the 51 in Perth, 9 were under one, and 12 over 60 years.

Of the whole 2409 Deaths registered, 831, or 34·5 per cent., were of children under five years of age. In Perth, 27·5 per cent. of the persons who died were under five years of age; in Leith, 28·4; in Edinburgh, 28·9; in Aberdeen, 33·2; in Glasgow, 36·0; in Paisley, 36·3; in Greenock, 36·6; and in Dundee, 39·6 per cent.

Miasmatic Diseases caused 262 Deaths, or 10·9 per cent. of the whole mortality. The percentage of deaths from this class of Diseases was greatest in Leith, where, chiefly in consequence of the prevalence of Smallpox and Hooping-Cough, it amounted to 15·6.

Small-pox caused 9 deaths, of which 2 occurred in Edinburgh, and 7 in Leith, or 6·4 per cent. of the total deaths in that town.

Hooping-Cough continued to be the most fatal epidemic, having caused 145 deaths, or 6·0 per cent. of the whole. In Edinburgh 5·7 per cent. of the deaths were caused by Hooping-Cough; in Glasgow, 6·0; in Leith, 6·4; in Dundee, 6·7; and in Aberdeen, 8·4 per cent.

Diphtheria caused 33 deaths; Diarrhoea and Dysentery, 29; Scarlatina, 28; Measles, 14; and Puerperal Fever, 7.

Fevers caused 28 deaths, of which 4 (1 in Glasgow, and 3 in Dundee) were attributed to Typhus, 22 to Enteric Fever, and one each to Cerebro-Spinal, and Simple Continued Fever.

Intemperance caused 10 deaths, of which 8 were ascribed to Chronic Alcoholism, and 2 to Delirium Tremens.

From Apoplexy there resulted 89 deaths; from Paralysis, 49; from Diseases of the Heart, 221; and from Premature Birth Debility, 86.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 419, or 17·4 per cent. of the whole. Those from Consumption alone numbered 331, or 13·7 per cent. 7 deaths were attributed to Croup.

90 deaths resulted from Violent Causes, of which 3 were suicides (all by Hanging).

3 males, and 3 females were aged 90 years and upwards, the eldest of whom was a Doctor of Medicine aged 94 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of MAY 1894.

Mean barometric pressure, 29·943 inches ; greater than the average for the same month of 1856–93 by 0·002 inch.

Barometric monthly range, 1·048 inch ; less by 0·036 inch.

Mean temperature,  $47^{\circ}0$  ; less by  $2^{\circ}8$ .

Mean daily range of temperature,  $14^{\circ}2$  ; less by  $0^{\circ}8$ .

Mean humidity, 77 ; being the average.

Rain, number of days, 20 ; greater by 6.

Rain, depth in inches, 3·04 ; greater by 0·79 inch.

Wind, pressure on square foot, 2·08 lbs. ; greater by 0·58 lb.

Wind, direction of, E. to W. as 10 to 9, and N. to S. as 8 to 5 ; the average being E. to W. as 9 to 6, and N. to S. as 5 to 6.

The month of May has therefore been remarkable for a very low mean temperature, an unusual prevalence of northerly winds blowing with a force also unusual, and a large rainfall, more than usually heavy at eastern stations.

The mean barometric pressure was the average, but relatively higher in the west than in the east, pressure being in the extreme east 0·050 inch higher than in the extreme west of Scotland. From this distribution of the pressure, winds from N.E., N., and N.W. prevailed on 12 days, being 4 days above the average of these directions. During the last 39 years such a prevalence of northerly winds has not been exceeded in any May, and was only once equalled in May 1885.

With these winds the mean temperature fell to  $47^{\circ}0$ , having previously been lower only in two years, *viz.*, 1856 and 1885, when it was respectively  $46^{\circ}8$  and  $46^{\circ}6$ . The means of the different towns were from  $2^{\circ}5$  to  $3^{\circ}0$  under their average. The absolute maximum temperature was  $66^{\circ}0$  at Perth on the 25th, and the absolute minimum  $28^{\circ}5$  also at Perth on 22nd. The coldest period of the month occurred from the 20th to the 24th, the mean of these five days being  $41^{\circ}8$  at Perth, or  $7^{\circ}8$  under the average, and at many places temperature fell considerably below freezing point, and great damage was done to the growing crops.

Rain fell on 20 days, a number only once exceeded in this month in 1885, when rain fell on 22 days, northerly winds being then unusually prevalent. The rainfall on the mean of the eight towns was 35 per cent. above the average, the greatest excess being 71 per cent. at Aberdeen, and the least 1 per cent. at Greenock. It was pretty well distributed through the month, and amounts of at least half an inch occurred at one or more of the eight towns on the 6th, 13th, 14th, and 27th. Hail and snow were of more frequent occurrence than usual in May.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

REPORT.

DURING the month of June 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3846 children, of whom 1935 were males, and 1911 females. Of these, 3585 were legitimate, and 261 illegitimate, being in the proportion of one illegitimate in every 14·7 Births, or the illegitimate Births constituted 6·8 per cent. of the whole. In Perth, 2·9 per cent. of the Births were illegitimate; in Glasgow, 6·0; in Leith, 6·3; in Greenock, 6·7; in Edinburgh, 6·8; in Paisley, 7·3; in Aberdeen, 9·1; and in Dundee, 9·3 per cent.

1747 Marriages were registered in these Towns during June, this number being 185 above the average for the month during the last ten years, allowing for increase of the population.

The Deaths of 2165 persons were registered in these Towns during June, of whom 1078 were males, and 1087 females. Allowing for increase of the population, this number is 263 below the average for the month during the last ten years.

A comparison of the Deaths registered shows that during June the mortality was at the annual rate of 13·3 deaths per thousand persons in Perth, 16·1 in Edinburgh and in Paisley, 17·1 in Leith, 18·3 in Glasgow and in Greenock, 18·6 in Dundee, and 19·4 in Aberdeen.

Of the 1032 Deaths registered in Glasgow, 212 were of children under one year of age, and 174 of persons over 60 years; of the 359 registered in Edinburgh, 70 were under one, and 83 over 60 years; of the 243 in Dundee, 58 were under

one year, and 47 over 60; of the 210 in Aberdeen, 49 were under one, and 56 over 60; of the 101 in Leith, 19 were under one, and 23 over 60; of the 93 in Paisley, 19 were under one, and 23 over 60; of the 94 in Greenock, 16 were under one, and 19 over 60; and of the 33 in Perth, 3 were under one, and 11 over 60 years.

Of the whole 2165 Deaths registered, 761, or 35·2 per cent., were of children under five years of age. In Perth, 15·2 per cent. of the persons who died were under five years of age; in Leith, 25·2; in Edinburgh, 30·9; in Greenock, 31·9; in Paisley, 34·4; in Glasgow, 36·8; in Aberdeen, 38·6; and in Dundee, 38·7 per cent.

Miasmatic Diseases caused 224 Deaths, or 10·3 per cent. of the whole. Only in Aberdeen and in Leith was this rate exceeded; in Aberdeen it amounted to 14·3, chiefly caused by the prevalence of Hooping-Cough; and in Leith it amounted to 18·9, and this rate was due principally to the number of deaths from Smallpox.

Hooping-Cough was the most fatal epidemic, having caused 87 deaths, or 4·0 per cent. of the whole mortality. In Glasgow 4·7, and in Aberdeen 7·6, per cent. of the mortality in these towns respectively, was caused by Hooping-Cough.

Small-pox caused 25 deaths, of which 6 occurred in Edinburgh, one each in Dundee and Aberdeen, and 17 in Leith, being at the rate of 15·3 per cent. of the total deaths in the latter town.

Diarrhoea and Dysentery caused 33 deaths; Measles, 30; Scarlatina, 29; Diphtheria, 29; and Puerperal Fever, 5.

Fevers caused 17 deaths, of which 2 (in Glasgow) were attributed to Typhus, and 15 to Enteric Fever.

Intemperance caused 5 deaths, of which 4 were ascribed to Chronic Alcoholism, and 1 to Delirium Tremens.

From Apoplexy there resulted 62 deaths; from Paralysis, 60; from Diseases of the Heart, 177; and from Premature Birth Debility, 64.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 385, or 17·8 per cent. of the whole. Those from Consumption alone numbered 259, or 12·0 per cent. 10 deaths were attributed to Croup.

102 deaths resulted from Violent Causes, of which 7 were Suicides—2 by Drowning, 2 by Hanging, 1 by Cut-Throat, 1 by Strangulation, and 1 by Carbolic Acid Poisoning.

Two males and 6 females had passed the 90th year of life, the eldest of whom were a male and a female aged respectively 93 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduce and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of JUNE 1894.

Mean barometric pressure, 29.972 inches ; greater than the average for the same month of 1856-93 by 0.030 inch.

Barometric monthly range, 0.873 inch ; less by 0.055 inch.

Mean temperature,  $54^{\circ}8$  ; less by  $1^{\circ}0$ .

Mean daily range of temperature,  $14^{\circ}9$  ; less by  $0^{\circ}4$ .

Mean humidity, 78 ; greater by 1.

Rain, number of days, 16 ; greater by 3.

Rain, depth in inches, 2.58 ; greater by 0.08 inch.

Wind, pressure on square foot, 1.13 lb. ; less by 0.22 lb.

Wind, direction of, E. to W. as 9 to 10, and N. to S. as 4 to 7 ; the average being E. to W. as 8 to 10, and N. to S. as 4 to 6.

Hence June 1894 has been characterised by a temperature under the average by a very irregular distribution of the rainfall, falling on three days more than usual for this month, and by a distribution of pressure above the average, the excess being, greater at western than at eastern stations, and this excess accompanied with an excess of east winds.

At Leith, temperature was  $0^{\circ}2$  above the mean but  $1^{\circ}8$  below it at Aberdeen. The defect of temperature was greatest at stations in the extreme east, and least between the estuaries of the Forth and Clyde. Everywhere, from the beginning of the month to about the 24th, temperature was markedly low, but on the other hand during the last week it was high, being particularly so at the more westerly stations, thus while at Aberdeen the highest was  $68^{\circ}2$ , it rose at Glasgow to  $84^{\circ}5$ , and at Paisley to  $83^{\circ}0$ . The absolutely lowest temperature was  $35^{\circ}8$  at Glasgow, whereas at Aberdeen the minimum for the month only fell to  $40^{\circ}5$ , thus giving for these two towns a monthly range of  $48^{\circ}7$  and  $27^{\circ}7$  respectively.

The absolutely largest rainfall, 3.40 inches, occurred at Perth, which mainly fell on the 4th, 10th and 11th, the amounts on these days being 1.07, 0.70, and 0.91 inch respectively. At Leith on the 5th, 1.04 inch fell, and during sixteen hours of the 4-5th, there fell 1.21 inch at Edinburgh. On the other hand, the largest daily fall was only 0.23 inch at Aberdeen, where, however, the greatest number of rainy days is recorded. On comparing the amounts at the large towns with their past averages, the rainfall is found to be 57 per cent. in excess at Perth, and there was a deficiency of 16 per cent. at Aberdeen.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JUNE 1894.

# MONTHLY RETURN

OF THE

## BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

JULY 1894.

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

### REPORT.

DURING the month of July 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3897 children, of whom 2038 were males, and 1859 females. Of these, 3589 were legitimate, and 308 illegitimate, being in the proportion of one illegitimate in every 12·7 Births, or the illegitimate Births constituted 7·9 per cent. of the whole. In Paisley, 3·3 per cent. of the Births were illegitimate; in Greenock, 5·7; in Leith, 6·4; in Glasgow, 6·8; in Perth, 8·9; in Dundee, 9·8; in Edinburgh, 10·0; and in Aberdeen, 12·0 per cent.

1614 Marriages were registered in these Towns during July, being 205 above the average number for the month during the last ten years, allowing for increase of population.

The Deaths of 2021 persons were registered in the same Towns during the month, of whom 1018 were males, and 1003 females. Increase of the population being allowed for, this number is 185 below the average for the month during the last ten years.

A comparison of the Deaths registered shows that during July the mortality was at the annual rate of 10·1 deaths per thousand persons in Perth, 13·7 in Leith, 15·1 in Edinburgh, 15·4 in Aberdeen, 16·2 in Paisley, 16·3 in Glasgow, 18·3 in Greenock, and 18·4 in Dundee.

Of the 950 Deaths registered in Glasgow, 186 were of children under one year of age, and 197 of persons over 60 years; of the 347 registered in Edinburgh, 64

were of children under one, and 71 of persons over 60 years; of the 248 in Dundee, 54 were under one, and 47 over 60 years; of the 172 in Aberdeen, 33 were under one, and 46 over 60; of the 84 in Leith, 20 were under one, and 15 over 60; of the 97 in Paisley, 15 were under one, and 22 over 60; of the 97 in Greenock, 22 were under one, and 16 over 60; and of the 26 in Perth, 4 were under one, and 6 over 60 years.

Of the whole 2021 Deaths registered, 650, or 32·2 per cent., were of children under five years of age. In Edinburgh, 27·7 per cent. of the persons who died were under five years of age; in Paisley, 27·8; in Aberdeen, 31·4; in Leith, 32·1; in Glasgow, 32·9; in Greenock, 33·0; in Perth, 34·6; and in Dundee, 37·1 per cent.

Miasmatic Diseases caused 155 Deaths, or 7·7 per cent. of the whole mortality. Although this rate was exceeded in four of the Towns, yet in none of them were any of these diseases so prevalent as to call for special remark, except perhaps in the case of Dundee, where 19 deaths resulted from Measles, being at the rate of 7·7 per cent. of the whole deaths there.

The most fatal epidemic was Measles, having caused 43 deaths, or 2·1 per cent. of the whole.

Small-pox caused 11 deaths, of which 8 occurred in Edinburgh, and 3 in Leith. The total number recorded during June was 25.

Diarrhoea and Dysentery caused 47 deaths; Hooping Cough, 30; Diphtheria, 29; Scarlatina, 21; and Puerperal Fever, 7.

Fevers caused 17 deaths, of which 15 were attributed to Enteric, and 2 to Simple Continued Fever.

Intemperance caused 10 deaths, of which 9 were ascribed to Chronic Alcoholism, and 1 to Delirium Tremens.

70 deaths resulted from Apoplexy, 45 from Paralysis, 210 from Diseases of the Heart, and 58 from Premature Birth Debility.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 270, or 13·4 per cent. of the whole. Those from Consumption alone numbered 250, or 12·4 per cent. 10 deaths were attributed to Croup.

81 deaths resulted from Violent Causes, of which 10 were Suicides—6 by Hanging, 2 by Drowning, and 2 by Cut-Throat.

Five females were aged 90 years and upwards, the eldest being the wife of a Fish Hawker, and was aged 98 years.

## THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of JULY 1894.

Mean barometric pressure, 29·834 inches; less than the average for the same month of 1856–93 by 0·044 inch.

Barometric monthly range, 1·126 inch; greater by 0·214 inch.

Mean temperature,  $59^{\circ}5$ ; greater by  $1^{\circ}3$ .

Mean daily range of temperature,  $14^{\circ}8$ ; greater by  $0^{\circ}4$ .

Mean humidity, 80; greater by 1.

Rain, number of days, 18; greater by 3.

Rain, depth in inches, 3·17; greater by 0·09 inch.

Wind, pressure on square foot, 1·38 lb.; greater by 0·02 lb.

Wind, direction of, E. to W. as 10 to 12, and N. to S. as 3 to 5; the average being E. to W. as 7 to 13, and N. to S. as 4 to 6.

The July of 1894 has been on the average a month with pressure a little under the average, but range of pressure a good deal above it; temperature, above the average; range of temperature, humidity and rainfall the average, three days of rain more than usual, and an excess of E. and S.E. winds.

The barometric pressure was considerably more under the monthly average at south-western than at north-eastern stations, and to this geographical distribution of the pressure, the greater prevalence of south-easterly wind and the higher temperature are to be directly traced.

Temperature was very unequally distributed, being  $1^{\circ}9$  above the average at Greenock, but only  $0^{\circ}4$  at Perth. The absolutely highest temperature was  $81^{\circ}5$  at Perth on the 1st, and the lowest  $41^{\circ}9$  at Glasgow on the 23rd. The mean rainfall was near the average but the amounts differed greatly in the different towns, being at Perth and Dundee about 20 per cent. in excess of the average, but at Greenock 19 per cent. below it, and in these two towns it fell on 21 and 13 days respectively. Thunderstorms with heavy rainfall occurred on the 6th, on which day there fell 1·36 inch at Glasgow, 1·24 inch at Paisley, and 1·19 inch at Greenock. Thunderstorms were also general on the 20th and 21st when heavy showers fell, accompanied in some instances with hail.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

REPORT.

DURING the month of August 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3771 children, of whom 1942 were males, and 1829 females. Of these, 3486 were legitimate, and 285 illegitimate, being in the proportion of one illegitimate in every 13·2 Births, or the illegitimate Births constituted 7·6 per cent. of the whole. In Leith, 2·5 per cent. of the Births were illegitimate; in Greenock, 5·7; in Aberdeen, 6·2; in Glasgow, 7·0; in Paisley, 7·6; in Dundee, 10·0; in Edinburgh, 10·1; and in Perth, 12·0 per cent.

806 Marriages were registered in these Towns during August, being 7 above the average number for the month during the last ten years, allowing for increase of population.

The Deaths of 1939 persons were registered in the same Towns during the month, of whom 936 were males, and 1003 females. Increase of the population being allowed for, this number is 273 below the average for the month during the last ten years.

A comparison of the Deaths registered shows that during August the mortality was at the annual rate of 12·8 deaths per thousand persons in Leith, 13·7 in Paisley, 14·3 in Edinburgh, 15·2 in Perth, 15·6 in Aberdeen, 16·0 in Glasgow, and 16·2 in Dundee and Greenock.

Of the 932 Deaths registered in Glasgow, 217 were of children under one year of age, and 185 of persons over 60 years; of the 330 registered in Edinburgh, 52

were of children under one, and 97 over 60 years; of the 218 in Dundee, 45 were under one, and 42 over 60 years; of the 174 in Aberdeen, 41 were under one, and 38 over 60; of the 78 in Leith, 26 were under one, and 17 over 60; of the 82 in Paisley, 21 were under one, and 19 over 60; of the 86 in Greenock, 26 were under one, and 15 over 60; and of the 39 in Perth, 8 were under one, and 14 over 60 years.

Of the whole 1939 Deaths registered, 677, or 34·9 per cent., were of children under five years of age. In Edinburgh, 24·8 per cent. of the persons who died were under five years of age; in Perth, 28·2; in Dundee, 35·3; in Aberdeen, 36·2; in Glasgow, 37·1; in Paisley, 37·8; in Greenock, 39·5; and in Leith, 42·3 per cent.

Miasmatic Diseases caused 154 Deaths, or 7·9 per cent. of the whole mortality. This rate was exceeded in three of the Towns, yet in none of them were any of these diseases so prevalent as to call for special remark, except perhaps in the case of Dundee, where 11 deaths resulted from Measles, being at the rate of 5·0 per cent. of the whole deaths there.

The most fatal epidemic was Hooping-Cough, having caused 43 deaths, or 2·2 per cent. of the whole.

Small-pox caused 2 deaths, 1 each in Leith and Greenock.

Diarrhoea and Dysentery caused 88 deaths; Diphtheria, 41; Measles, 28; Scarletina, 15; Puerperal Fever, 8; and Simple Cholera, 6.

Fevers caused 20 deaths, of which 19 were attributed to Enteric, and 1 to Simple Continued Fever.

Intemperance caused 15 deaths, of which 13 were ascribed to Chronic Alcoholism, and 2 to Delirium Tremens.

83 deaths resulted from Apoplexy, 55 from Paralysis, 171 from Diseases of the Heart, and 74 from Premature Birth Debility.

The deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 234, or 12·1 per cent. of the whole. Those from Consumption alone numbered 233, or 12·0 per cent. 12 deaths were attributed to Croup.

83 deaths resulted from Violent Causes, of which 8 were Suicides—4 by Hanging 2 by Poison, and 1 each by Cut-Throat and Drowning.

One male and one female were aged 90 years and upwards, the eldest being a female annuitant aged 93 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

### For the month of AUGUST 1894.

Mean barometric pressure, 29·820 inches ; less than the average for the same month of 1856–93 by 0·040 inch.

Barometric monthly range, 1·121 inch ; greater by 0·138 inch.

Mean temperature,  $56^{\circ}6$  ; less by  $1^{\circ}0$ .

Mean daily range of temperature,  $13^{\circ}6$  ; less by  $0^{\circ}4$ .

Mean humidity, 80 ; less by 1·4.

Rain, number of days, 18 ; greater by 2.

Rain, depth in inches, 4·65 ; greater by 1·16 inch.

Wind, pressure on square foot, 1·28 lb. ; less by 0·06 lb.

Wind, direction of, E. to W. as 4 to 17, and N. to S. as 6 to 3 ; the average being E. to W. as 6 to 12, and N. to S. as 4 to 6.

The weather of August has thus been characterised by a large rainfall, distributed over a larger number of days than usual ; a mean temperature under the average ; a barometric pressure under the average, but with a monthly range considerably above it ; and with a marked prevalence of W., N.W., and N. winds.

The mean temperature was  $1^{\circ}0$  under the average, the days being  $1^{\circ}2$  and the nights  $0^{\circ}8$  colder than the average of the month. The maximum shade temperature was  $70^{\circ}2$  at Leith on the 1st and 8th ; and the minimum  $40^{\circ}1$  at Glasgow on the 25th.

At Perth the largest amount of rain, 6·26 inches, was recorded, being 109 per cent. above the average ; whilst at Greenock the fall was 7 per cent. under the average, the amount being 4·67 inches. Several heavy falls occurred during the month. Thus at Greenock there fell 1·66 inch on the 13th, and 1·05 inch on the 14th ; at Glasgow, 1·00 inch on the 2nd, and 1·13 inch on the 13th ; at Edinburgh, 1·24 inch on the 2nd ; at Dundee, 1·21 inch on the 2nd ; at Aberdeen, 1·44 inch on the 3rd ; and at Perth, 1·45 inch on the 2nd, and 1·42 inch on the 14th. At Perth there fell 2·64 inches from the 13th to the 15th. These and other heavy rains did much damage to the standing crops.

As regards the distribution of the pressure, it was higher in the west than in the east, and fell more rapidly than usual on advancing northward ; and from this peculiarity of distribution resulted the remarkable prevalence of westerly and northerly winds, the rather low temperature, and the large rainfall.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of AUGUST 1894.

# MONTHLY RETURN

OF THE

## BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF

SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

SEPTEMBER 1894.

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

### REPORT.

DURING the month of September 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3356 children, of whom 1765 were males, and 1591 females. Of these, 3110 were legitimate, and 246 illegitimate, being in the proportion of one illegitimate in every 13·6 Births, or the illegitimate Births constituted 7·3 per cent. of the whole. In Leith, 4·0 per cent. of the Births were illegitimate; in Perth, 4·7; in Paisley, 5·7; in Glasgow, 7·0; in Greenock, 8·0; in Edinburgh, 8·1; in Aberdeen, 8·6; and in Dundee, 9·1 per cent.

840 Marriages were registered in these Towns during September, being 50 above the average number for the month during the last ten years, allowing for increase of the population.

The Deaths of 1784 persons were registered in these Towns during the month, of whom 916 were males, and 868 females. Allowance being made for increase of the population, this number is 358 below the September average of the last ten years.

A comparison of the Deaths registered shows that during September the mortality was at the annual rate of 12·3 deaths per thousand persons in Dundee, 12·7 in Leith, 12·8 in Aberdeen, 14·2 in Edinburgh, 15·3 in Glasgow, 16·1 in Paisley and in Perth, and 19·1 in Greenock.

Of the 863 Deaths registered in Glasgow, 159 were of children under one year of age, and 177 of persons over 60 years; of the 316 registered in Edinburgh, 69

were of children under one year, and 79 of persons over 60 years; of the 160 in Dundee, 44 were under one, and 33 over 60 years; of the 139 in Aberdeen, 29 were under one, and 40 over 60; of the 75 in Leith, 18 were under one, and 19 over 60; of the 93 in Paisley, 17 were under one, and 30 over 60; of the 98 in Greenock, 18 were under one, and 22 over 60; and of the 40 in Perth, 6 were under one, and 16 over 60 years.

Of the whole 1784 Deaths registered, 605, or 33·9 per cent., were of children under five years of age. In Perth, 25·0 per cent. of the persons who died were under five years of age; in Paisley, 26·9; in Aberdeen, 30·9; in Edinburgh, 31·3; in Greenock, 34·7; in Glasgow, 34·8; in Leith, 38·7; and in Dundee, 40·6 per cent.

Miasmatic Diseases caused 161 Deaths, or 9·0 per cent. of the whole mortality. This rate was exceeded in Glasgow, Greenock, and Dundee, but in none of these towns was any disease so prevalent as to call for special notice.

Diphtheria was the most fatal epidemic, having caused 49 deaths, or 2·7 per cent. of the whole.

Two deaths from Small-pox occurred in Edinburgh.

Diarrhoea and Dysentery caused 59 deaths; Hooping-Cough, 40; Scarlatina, 29; Measles, 11; and Puerperal Fever, 6.

Fevers caused 27 deaths, of which 2 were attributed to Typhus (both in Glasgow), 24 to Enteric, and 1 to Simple Continued Fever.

Intemperance caused 4 deaths, of which 1 was ascribed to Chronic Alcoholism, and 3 to Delirium Tremens.

71 deaths resulted from Apoplexy, 41 from Paralysis, 147 from Diseases of the Heart, and 60 from Premature Birth Debility.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 263, or 14·7 per cent. of the whole. Those from Consumption alone numbered 175, or 9·8 per cent. 19 deaths were attributed to Croup.

66 deaths resulted from Violent Causes, of which 5 were Suicides—4 by Gunshot, and 1 by Hanging.

Four females were aged 90 years and upwards, the eldest being the widow of a farmer, and was aged 99 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of SEPTEMBER 1894.

Mean barometric pressure, 30.221 inches ; greater than the average for the same month of 1856-93 by 0.392 inch.

Barometric monthly range, 0.676 inch ; less by 0.520 inch.

Mean temperature,  $52^{\circ}5$  ; less by  $1^{\circ}2$ .

Mean daily range of temperature,  $14^{\circ}5$  ; greater by  $2^{\circ}1$ .

Mean humidity, 82 ; less by 1.5.

Rain, number of days, 8 ; less by 8.

Rain, depth in inches, 0.35 ; less by 3.10 inch.

Wind, pressure on square foot, 0.96 lb. ; less by 0.49 lb.

Wind, direction of, E. to W. as 11 to 7, and N. to S. as 8 to 2 ; the average being E. to W. as 5 to 12, and N. to S. as 4 to 6.

The month of September 1894, as compared with the previous 38 Septembers, showed a higher mean barometric pressure, a lower monthly barometric range, a smaller rainfall, and a much greater predominance of northerly and easterly winds than any recorded during these years.

Barometric pressure was higher at western than at eastern stations, instead of lower, as it is in average years ; and from this distribution of the pressure, inevitably resulted the extraordinary prevalence of northerly and easterly winds. Winds from N.W., N., N.E., and E., prevailed on 20 days, the nearest approach to this being 18 days in September 1868. •

These winds, together with the type of anti-cyclonic weather which prevailed, resulted in the low temperature of the month,  $1^{\circ}2$  under the average, and the dryness of the weather, with the accompanying large daily range of temperature at all of the eight large towns. The absolutely highest temperature was  $71^{\circ}4$  at Glasgow on the 16th, and the lowest  $30^{\circ}8$  at the same place on the 28th. Frosts on the 27th and 28th occurred chiefly in inland situations in the southern half of Scotland, doing no little damage to dahlias and other tender plants.

The largest rainfall was 0.62 inch at Aberdeen, and the amount was only 0.20 inch at Glasgow, Dundee, and Greenock. The drought was thus pretty evenly distributed over the towns, and as regards the averages, the fall at Greenock was 97 per cent., and at Leith 76 per cent., under the means. The rain fell only in unusually small daily amounts, falling at Aberdeen on 17 days, and at Perth on 3 days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of SEPTEMBER 1894.

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

REPORT.

DURING the month of October 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4194 children, of whom 2112 were males, and 2082 females. Of these, 3876 were legitimate, and 318 illegitimate, being in the proportion of one illegitimate in every 13·2 Births, or the illegitimate Births constituted 7·6 per cent. of the whole. In Leith, 2·9 per cent. of the Births were illegitimate; in Greenock, 5·9; in Glasgow, 7·0; in Edinburgh, 8·1; in Dundee, 8·4; in Paisley, 9·1; in Perth, 9·8; and in Aberdeen, 10·8 per cent.

915 Marriages were registered in these Towns during October, being 104 above the average number for the month during the last ten years, allowing for increase of the population.

The Deaths of 2335 persons were registered in these Towns during the month, of whom 1191 were males, and 1144 females. Allowance being made for increase of the population, this number is 15 below the October average of the last ten years.

A comparison of the Deaths registered shows that during October the mortality was at the annual rate of 13·2 per thousand persons in Leith, 15·3 in Dundee, 16·5 in Aberdeen, 19·4 in Glasgow, 19·5 in Edinburgh, 19·9 in Perth, 20·2 in Paisley, and 21·1 in Greenock.

Of the 1130 Deaths registered in Glasgow, 252 were of children under one year of age, and 227 of persons over 60 years; of the 449 registered in Edinburgh, 101

were of children under one year, and 114 of persons over 60 years; of the 206 in Dundee, 61 were under one, and 46 over 60; of the 185 in Aberdeen, 37 were under one, and 60 over 60; of the 81 in Leith, 29 were under one, and 15 over 60; of the 121 in Paisley, 32 were under one, and 27 over 60; of the 112 in Greenock, 33 were under one, and 29 over 60; and of the 51 in Perth, 7 were under one, and 15 over 60 years.

Of the whole 2335 Deaths registered, 862, or 36·9 per cent., were of children under five years of age. In Perth, 25·5 per cent. of the persons who died were under five years of age; in Edinburgh and Aberdeen, 31·4; in Paisley, 38·0; in Dundee, 38·8; in Glasgow, 39·6; in Leith, 43·2; and in Greenock, 45·5 per cent.

Miasmatic Diseases caused 169 Deaths, or 7·2 per cent. of the whole mortality. This rate was exceeded in Glasgow, Greenock, and Perth, but in none of these towns was any disease so prevalent as to call for special notice.

Diphtheria was the most fatal epidemic, having caused 46 deaths, or 2·0 per cent. of the whole.

Three deaths from Small-pox occurred in Edinburgh.

Diarrhoea and Dysentery caused 52 deaths; Scarlatina, 32; Hooping-Cough, 27; Measles, 24; and Puerperal Fever, 12.

Fevers caused 28 deaths, of which 2 were attributed to Typhus (both in Greenock), and 26 to Enteric Fever.

Intemperance caused 3 deaths, all of which were ascribed to Chronic Alcoholism.

93 deaths resulted from Apoplexy, 47 from Paralysis, 211 from Diseases of the Heart, and 64 from Premature Birth Debility.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 452, or 19·4 per cent. of the whole. Those from Consumption alone numbered 247, or 10·6 per cent. 35 deaths were attributed to Croup.

88 deaths resulted from Violent Causes, of which 6 were Suicides—2 by Drowning, 2 by Cut-throat, 1 by Hanging, and 1 by Gunshot Wounds.

One Male and eight females were aged 90 years and upwards, the eldest being a female annuitant, and was aged 95 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of OCTOBER 1894.

Mean barometric pressure, 29.924 inches; greater than the average for the same month of 1856-93 by 0.111 inch.

Barometric monthly range, 1.813 inch; greater by 0.338 inch.

Mean temperature,  $46^{\circ}0$ ; less by  $1^{\circ}2$ .

Mean daily range of temperature,  $13^{\circ}2$ ; greater by  $1^{\circ}7$ .

Mean humidity, 88; greater by 2.4.

Rain, number of days, 18; greater by 2.

Rain, depth in inches, 3.43; less by 0.21 inch.

Wind, pressure on square foot, 1.03 lb.; less by 0.60 lb.

Wind, direction of, E. to W. as 11 to 7, and N. to S. as 5 to 5; the average being E. to W. as 6 to 12, and N. to S. as 3 to 6.

Hence October 1894 was characterised by a barometric pressure and range considerably above the average; a temperature fully a degree under, and mean daily range nearly two degrees above, the average; and, just as in the preceding month, a marked predominance of easterly and northerly winds.

Barometric pressure was a little higher in the west than in the east, instead of lower, as the average of years shows it to be, resulting in an excess of north-easterly winds. It was also considerably above the average, the excess increasing on advancing from south to north, being only 0.105 inch on the Solway, but 0.165 inch on the Moray Firth. Thus gradients were less steep than usual, and the force of the wind greatly less.

During nearly the whole of the first three weeks, the type of the prevailing weather was anticyclonic, with the characteristic high barometers, dry atmosphere, and large daily range of temperature. About the 20th hail fell at several of the towns, and thereafter the weather became colder and wetter. The highest mean temperature was  $46^{\circ}9$  at Leith, and the lowest  $44^{\circ}6$  at Perth; and the absolutely highest temperature observed was  $65^{\circ}8$  at Glasgow on the 11th, and the lowest  $22^{\circ}0$  at Perth on the 19th.

For the first three weeks the rainfall was small, but it fell on a greater number of days than usual; but on and after the 20th the amount was rather large. At Greenock, 1.18 inch fell on the 23rd, and 1.07 inch on the 31st; at Glasgow, 1.13 inch on the 23rd; and 1.15 inch at Perth on the 31st. Perth recorded the largest amount of rain, 4.43 inches, being 46 per cent. above its average; Greenock, 4.37 inches, which, however, is 33 per cent. below its average. At Dundee, Perth, Leith, and Edinburgh, the rainfall was a good deal above their averages; but at Aberdeen, Glasgow, and Greenock, the amounts fell short of their averages.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of OCTOBER 1894.

MONTHLY RETURN  
OF THE  
BIRTHS, DEATHS, AND MARRIAGES  
REGISTERED.  
IN EIGHT OF THE PRINCIPAL TOWNS OF  
SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

NOVEMBER 1894.

---

Published by Authority of the Registrar-General.

---

EDINBURGH: Printed for Her Majesty's Stationery Office by NEILL & Co., Old Fishmarket Close, and sold by JOHN MENZIES & Co., 12 Hanover Street, Edinburgh, and 90 West Nile Street, Glasgow.

---

REPORT.

DURING the month of November 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3845 children, of whom 1985 were males, and 1860 females. Of these, 3552 were legitimate, and 293 illegitimate, being in the proportion of one illegitimate in every 13·1 Births, or the illegitimate Births constituted 7·6 per cent. of the whole. In Leith, 3·1 per cent. of the Births were illegitimate; in Glasgow, 6·6; in Greenock, 6·8; in Edinburgh, 7·9; in Paisley, 9·4; in Aberdeen, 10·4; in Dundee, 10·5; and in Perth, 10·8 per cent.

826 Marriages were registered in these Towns during November. This is 127 below the average number for the month during the last ten years, increase of the population being allowed for.

The Deaths of 2592 persons were registered in these Towns during the month, of whom 1315 were males, and 1277 females. Allowing for increase of the population, this is 41 below the November average of the last ten years.

A comparison of the Deaths registered shows that during November the mortality was at the annual rate of 16·6 per thousand persons in Leith, 16·9 in Perth, 18·5 in Paisley, 20·1 in Dundee and in Aberdeen, 20·4 in Edinburgh, 22·8 in Glasgow, and 24·2 in Greenock.

Of the 1287 Deaths registered in Glasgow, 307 were of children under one year of age, and 184 of persons over 60 years; of the 454 Deaths in Edinburgh, 104 were of children under one year, and 123 of persons over 60; of the 262

in Dundee, 80 were of children under one, and 59 over 60; of the 218 in Aberdeen, 73 were under one, and 54 over 60; of the 98 in Leith, 33 were under one, and 16 over 60; of the 107 in Paisley, 33 were under one, and 19 over 60; of the 124 in Greenock, 30 were under one, and 26 over 60; and of the 42 in Perth, 8 were under one, and 11 over 60 years.

Of the whole 2592 Deaths registered, 1150, or 44·4 per cent., were of children under five years of age. In Edinburgh, 33·9 per cent. of the persons who died were under five years of age; in Perth, 35·7; in Greenock, 45·2; in Glasgow, 45·8; in Dundee, 46·9; in Aberdeen, 49·5; in Leith, 50·0; and in Paisley, 52·3 per cent.

Miasmatic Diseases caused 270 Deaths, or 10·4 per cent. of the whole mortality. This rate was only exceeded in Glasgow, where the rate was 13·0 per cent.

Measles was the most fatal epidemic, having caused 67 deaths, or 2·6 per cent. of the whole. In Glasgow, 55 deaths were caused by Measles, being at the rate of 4·3 per cent. of the deaths in that town.

Small-pox caused 15 deaths, all of which occurred in Edinburgh, and constituted 3·3 per cent. of the deaths there.

Fevers caused 27 deaths, of which 2 (1 in Glasgow, and 1 in Dundee) were attributed to Typhus, and 25 to Enteric Fever.

Diphtheria caused 53 deaths; Hooping-Cough, 50; Scarlatina, 38; and Puerperal Fever, 7.

5 deaths resulted from Intemperance, of which 4 were ascribed to Chronic Alcoholism, and 1 to Delirium Tremens.

Apoplexy caused 75 deaths; Paralysis, 46; Diseases of the Heart, 207; and Premature Birth Debility, 63.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 660, or 25·5 per cent. of the whole. Those from Consumption alone numbered 197, or 7·6 per cent. Croup caused 25 deaths.

75 deaths resulted from Violent Causes, of which 1 was Suicidal—by Drowning.

Two Males and five females were aged 90 years and upwards, the oldest being a male—a retired shoemaker—aged 95 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

### For the month of NOVEMBER 1894.

Mean barometric pressure, 29.777 inches; less than the average for the same month of 1856-93 by 0.060 inch.

Barometric monthly range, 1.724 inch; greater by 0.170 inch.

Mean temperature,  $45^{\circ}5$ ; greater by  $4^{\circ}2$ .

Mean daily range of temperature,  $9^{\circ}5$ ; less by  $0^{\circ}5$ .

Mean humidity, 86; greater by 0.4.

Rain, number of days, 17; greater by 1.

Rain, depth in inches, 2.45; less by 0.97 inch.

Wind, pressure on square foot, 2.29 lbs.; greater by 0.62 lb.

Wind, direction of, E. to W. as 4 to 14, and N. to S. as 1 to 11; the average being E. to W. as 6 to 11, and N. to S. as 4 to 6.

November 1894 has been remarkable for a mean temperature higher than any recorded for this month by the Society. Barometric pressure was rather low, but much lower than the average at northern than at southern stations, with the accompanying result of an unwonted predominance of south-westerly winds, blowing with a mean force greatly above the average.

While barometric pressure on the Solway Firth was only 0.040 inch under the average, it was 0.191 inch at Stornoway, a difference due to the circumstance that the general course of cyclones was outside and to the north of Scotland. Hence winds from S., S.W., and W. prevailed nine days more than the average, bringing with them a phenomenally high mean temperature, being fully a degree higher than that of November 1881, the next highest since 1856.

The highest mean temperatures occurred at the large towns in the west, and the lowest from Perth to Aberdeen. The absolutely highest temperature was  $60^{\circ}3$  at Edinburgh on the 2nd, and the lowest  $26^{\circ}5$  at Perth on the 24th.

Nearly the whole of the rain fell during the first three weeks, little or none falling after the 21st. As was to be expected from the strong persistent south-westerly winds, the amount of the rainfall was much greater at western than at eastern stations. Thus at Greenock the rainfall was 6.39 inches, which at this place is the average of November, but at Perth only 1.12 inch fell, being 63 per cent. under its average. There was a singular absence of very large daily falls, the largest being 1.13 inch at Greenock on the 13th, a fall not approached by any of the other towns.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of NOVEMBER 1894.

**REPORT.**

DURING the month of December 1894, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3815 children, of whom 1989 were males and 1826 females. Of these, 3549 were legitimate and 266 illegitimate, being in the proportion of one illegitimate in every 14·3 Births, or the illegitimate Births constituted 7·0 per cent. of the whole. In Greenock, 2·0 per cent. of the Births were illegitimate; in Paisley, 4·2; in Leith, 4·6; in Glasgow, 6·5; in Perth, 8·0; in Aberdeen, 8·6; in Edinburgh, 8·9; and in Dundee, 9·0 per cent.

1411 Marriages were registered in these Towns during the month. This is the highest number hitherto recorded during any month of December, and, allowing for increase of the population, is 251 above the average for the month during the last ten years.

The Deaths of 2780 persons were recorded in these Towns during December, of whom 1423 were males and 1357 females. Increase of the population being allowed for, this number is 189 below the average for the month during the last ten years.

A comparison of the Deaths registered shows that during December the mortality was at the annual rate of 15·5 deaths per thousand persons in Leith, 19·2 in Greenock, 19·5 in Edinburgh, 20·3 in Dundee, 20·4 in Paisley, 20·6 in Perth, 24·1 in Glasgow, and 25·5 in Aberdeen.

Of the 1403 Deaths registered in Glasgow, 349 were of children under one year

of age, and 218 of persons over 60 years; of the 447 in Edinburgh, 87 were under one year, and 109 over 60; of the 273 in Dundee, 76 were under one, and 48 over 60; of the 285 in Aberdeen, 92 were under one, and 48 over 60; of the 95 in Leith, 24 were under one, and 28 over 60; of the 122 in Paisley, 22 were under one, and 29 over 60; of the 102 in Greenock, 21 were under one, and 26 over 60; and of the 53 in Perth, 11 were under one, and 14 over 60 years.

Of the whole 2780 Deaths registered, 1217, or 43·8 per cent., were of children under five years of age. In Edinburgh, 31·5 per cent. of the persons who died were under five years of age; in Paisley, 32·0; in Greenock, 32·4; in Leith, 34·7; in Perth, 37·7; in Dundee, 44·3; in Glasgow, 48·2; and in Aberdeen, 54·0 per cent.

Miasmatic Diseases caused 363 Deaths, or 13·1 per cent. of the whole mortality. This rate was exceeded in Glasgow, chiefly on account of the prevalence of Measles, in Greenock from that of Hooping-Cough, and in Aberdeen from Measles.

Measles was the most fatal epidemic, having caused 168 deaths, or 6·0 per cent. of the whole mortality. In Glasgow, 7·3 per cent., and in Aberdeen 13·7 per cent. of the deaths in these towns respectively were caused by Measles.

Small-pox caused 15 deaths, all of which occurred in Edinburgh, and constituted 3·4 per cent. of the deaths in that town.

Fevers caused 24 deaths, of which 2 (1 in Edinburgh and 1 in Paisley) were ascribed to Typhus, 21 to Enteric, and 1 to Simple Continued Fever.

Hooping-Cough caused 68 deaths; Scarlatina, 41; Diphtheria, 32; and Puerperal Fever, 14.

Intemperance was the cause of 7 deaths, of which 6 were attributed to Chronic Alcoholism, and 1 to Delirium Tremens.

Apoplexy caused 68 deaths; Paralysis, 53; Heart Disease, 223; and Premature Birth Debility, 74.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 661, or 23·8 per cent. Those from Consumption alone numbered 255, or 9·2 per cent. 19 deaths were caused by Croup.

From Violent Causes there resulted 112 deaths, 5 of which were Suicidal (3 by Hanging, 1 by Cut-throat, and 1 by Poison).

Three Males and seven females were aged 90 years and upwards, the eldest of whom was the widow of a weaver, and was aged 98 years.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 139 feet above the sea-level,

For the month of DECEMBER 1894.

Mean barometric pressure, 29·850 inches ; greater than the average for the same month of 1856–93 by 0·042 inch.

Barometric monthly range, 2·192 inch ; greater by 0·606 inch.

Mean temperature,  $40^{\circ}8$  ; greater by  $2^{\circ}4$ .

Mean daily range of temperature,  $9^{\circ}6$  ; greater by  $0^{\circ}5$ .

Mean humidity, 86 ; less by 0·8.

Rain, number of days, 19 ; greater by 2.

Rain, depth in inches, 2·93 ; less by 0·79 inch.

Wind, pressure on square foot, 2·55 lbs. ; greater by 0·68 lb.

Wind, direction of, E. to W. as 5 to 15, and N. to S. as 5 to 5 ; the average being E. to W. as 5 to 13, and N. to S. as 4 to 7.

The month of December 1894 has been remarkable for a temperature considerably above the average, a barometric pressure above, and range very much above, the average, a rainfall under the average ; and for two storms, one on the 21–22nd and the other on the 28–30th, which will be long remembered for their severity and disastrous effects on sea and land.

Barometric pressure was above the average in the south, but under it in the north, thus increasing the gradient for south-westerly winds. In addition to its extraordinary severity, the storm of the 22nd is further noteworthy for the rapidity with which the barometer rose, the hourly amounts of increase at Leith from 8 a.m. to 2 p.m. being 0·125, 0·200, 0·213, 0·177, 0·157, and 0·152 inch. Winds from W. and N.W. were 3 days above, and from S.W. 3 days under, the average resulting from the distribution of the barometric pressure of the month.

The temperature was nearly two degrees above the mean at all the large towns. The absolutely highest was  $56^{\circ}2$  at Edinburgh on the 13th ; and the lowest  $27^{\circ}6$ , also at Edinburgh, on the 31st.

The rainfall was under the average at all the towns, the extremes being 29 per cent. at Dundee and 8 per cent. at Edinburgh. It was pretty evenly distributed during the month, but, considering the number of great wide spread cyclones that occurred, there was a remarkable absence of large daily amounts, the only instance exceeding an inch being 1·66 inch on the 21st at Greenock.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of DECEMBER 1894.
